DETAILED ACTION

This office action is in response to the Preliminary Amendment of October 7, 2003 which canceled claims 1-22 and added new claims 23-31.

Terminal Disclaimer

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23-31 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,520,758. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim 1 of the instant invention sets forth that the airend and the separator tank are a single unit. While claim 1 of the patent sets forth that the airend is

mounted to the separator tank. Claim 1 of the instant invention basically sets forth the same limitations as the patent more succinctly. Claim 2 of the instant invention also sets forth one of the limitations of claim 1 of the patented claim 1. Therefore claim 1 of the instant invention is slightly broader than claim 1 of the patent.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grime et al and Sowards disclose compressors connected to separator tanks.
